EUROSILICONE™

EUROSILICONE™

Eurosilicone is a leading manufacturer within the global plastic surgery community. We are an innovative developer and manufacturer of a complete range of quality surgical implants and tissue expanders.

Eurosilicone products are manufactured in state-of-the-art facilities in Apt, France and in full compliance with EN ISO 9001 and EN ISO 13485 requirements. Eurosilicone products are CE certified according to the Medical Device Directive 93/42/EEC.

The exact dimensions of the products may vary slightly from the dimensions indicated in the catalogue.

# Breast Aesthetics

# Introduction to Breast Aesthetics

## Shapes:

- Round: The Round Collection
- Anatomical: The Matrix

## Silicone Gel:

Eurosilicone's cohesive silicone gels are colour coded to show different levels of firmness.

- Soft Cohesive Gel
- Natural Cohesive Gel

## Shell surface:

- Smooth
- Cristalline Microtextured
- Cristalline Textured

## Cristalline:

Eurosilicone's latest texturing technology is intended to favour tissue adherence and reduce the incidence of capsular contracture.

## Paragel:

Eurosilicone's 360° barrier layer technology minimizing gel diffusion.

## Premium Patient Warranty:

Lifetime product replacement warranty, for details view our brochure.

## Instructions for use:

We encourage surgeons to refer to the package insert supplied with every Eurosilicone product for instructions for use, indications and contraindications.

# Round Collection

## Natural Cohesive Design

# The Matrix

by Eurosilicone

## The Matrix

9 different profiles with 102 variations  
Cristalline Textured shell

- Natural Cohesive Gel

# The Matrix

by Eurosilicone

- ✓ **9 different cells with 102 different variations** and sizes of anatomical shaped breast implants.
- ✓ **A unique preoperative planning system** for greater precision and custom fitting.
- ✓ **Variable heights:** Low, Moderate and Full - which is determined by the patient's measurements of the distance between the existing SN-N (Sternal Notch - Nipple).
- ✓ **Variable projections:** Low, Moderate and High - which meets the patient's desire for small, moderate or large projection.
- ✓ **Natural Cohesive Gel:** Form stable high cohesive silicone gel-fill material - provides controlled gel distribution.
- ✓ **Cristalline Textured:** Eurosilicone's latest texturing technology is intended to favour tissue adherence and reduce the incidence of capsular contracture.
- ✓ **Paragel 360° Barrier Layer:** Eurosilicone's barrier layer technology minimizing gel diffusion.

## The Matrix

# Round Collection

- ✓ **11 different configurations with 219 variations.**
- ✓ **Variable projections:** Low, Medium, Medium Extra-High, High, Extra high - which meet the patient desire for low, moderate or large augmentation.
- ✓ **Shell surface:** Smooth or Cristalline Microtextured.
- ✓ **Silicone gel:** Soft Cohesive or Natural Cohesive.
- ✓ **Paragel 360° Barrier Layer:** Eurosilicone's barrier layer technology minimizing gel diffusion.

## Round Collection

### Natural Cohesive Design Microtextured Shell

### Soft Cohesive Design Microtextured Shell

### Soft Cohesive Design Smooth Shell

# Dimensions & Volumes - Round Implants Smooth & Microtextured

The dimensions are in mm and the volumes in cc.  
The projection in vertical scale and the diameter in horizontal scale.

# Round Collection

Natural Cohesive Design

## Natural Cohesive Design Microtextured Shell

- ✓ **3 different configurations with 59 different variations.**
- ✓ **Fully filled.**
- ✓ **Natural Cohesive Gel:** Form stable high cohesive silicone gel – provides controlled gel distribution.
- ✓ **3 variable projections:** Medium, Medium Extra-High and Extra High – which meet the patient's desire for moderate or large augmentation.
- ✓ **Paragel 360° Barrier Layer:** Eurosilicone's barrier layer technology minimizing gel diffusion.
- ✓ **Cristalline Microtextured:** Eurosilicone's latest texturing technology is intended to favour tissue adherence and reduce the incidence of capsular contracture.

## ES 802N Medium Profile

Product Code	Diameter (cm)	Projection (cm)	Volume (cc)	Sizer	
				Gel-filled	Inflatable

# Round Collection

Soft Cohesive Design

# Soft Cohesive Design Smooth Shell

- ✓ **4 different configurations with 80 different variations.**
- ✓ **Soft Cohesive Gel:** Form stable cohesive silicone gel - eases manipulation and insertion.
- ✓ **4 variable projections:** Low, Medium, High and Extra High - which meet the patient's desire for low, moderate or large augmentation.
- ✓ **Paragel 360° Barrier Layer:** Eurosilicone's barrier layer technology minimizing gel diffusion.
- ✓ **Smooth shell surface.**

# Integrated Valve Tissue Expanders

- ✓ Large integrated magnetic injection port with self sealing technology and needle stop
- ✓ Reinforced base layer to insure unidirectional expansion
- ✓ Unique device identification
- ✓ Unique, re-usable and ergonomically shaped external location device enabling efficient valve detection
- ✓ Complements The Matrix by Eurosilicone range of implants
- ✓ Unique set of footprint templates to assist surgical planning and expander selection

# Integrated Valve Tissue Expanders

- ✓ 3 different configurations with 16 different variations
- ✓ Anatomical shape, textured
- ✓ Re-usable External Locating Device
- ✓ Integrated injection site with self-sealing technology which helps to facilitate the transfer of saline solution from the needle to the product

All device dimensions correspond to the suggested volume.

Eurosilicone Integrated Tissue Expanders must be filled with a sterile isotonic solution only.

A 21 gauge standard bevel hypodermic needle must be used in order to inflate the device through the injection site.

## External Location Device

Can be ordered separately  
Product code: ELD

# Remote Valve Tissue Expanders

Round Design

Rectangular Design

Cylindrical Design

Croissant Design

# Remote Valve Tissue Expanders are available in 5 different configurations

- ✓ Round shape, smooth
- ✓ Rectangular shape, smooth
- ✓ Cylindrical Curved and Straight shape, smooth
- ✓ Croissant shape, smooth

All device dimensions correspond to the suggested fill volume.

Eurosilicone Remote Valve Tissue Expanders must be filled with a sterile isotonic solution only.

A fill tube is connected to every tissue expander to allow inflation of the device through an injection port.

All Eurosilicone Remote Valve Tissue Expanders with a recommended fill volume of more than 150cc are provided with a 28mm injection port, smaller volume devices are provided with a 20mm injection port.
