GC Aesthetics®

A Confident Choice for Life™

Breast Reconstruction restores the shape and appearance of the breast. You may consider breast reconstruction following a mastectomy or a lumpectomy, but the decision for each woman is personal.

Most women undergoing breast augmentation, revision or reconstruction are suitable for anatomical implants. These type of breast implants are the ideal choice if you want a more natural-looking shape. They are slim at the top and widen towards the bottom to mimic a breast like shape¹.

At GCA®, we are proud to integrate into our innovative breast implant portfolio, Luna XT™. We encourage you to educate yourself as much as possible and listen to the advice of your qualified surgeon.

| A Confident Choice for Life™

State of the Art Technology

During the breast surgery decision process, there are two points to consider: **safety and aesthetics**. You want to enjoy an attractive and natural-looking shape as well as good health.

Luna XT™, the anatomical breast implant is an industry-leading innovation to meet women's needs. Its technology has reliable long-term performance and fulfils all the rigorous standards to reassure the shell integrity, the implant resistance and its biocompatibility².

The first breast implant in
the market to meet the
latest European Medical
Device Safety and
Performance Regulations²

Designed-in safety

Designed for you

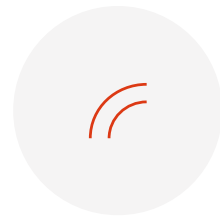

Anatomical implants are popular because of the **natural enhancement** they offer as well as **correcting shape problems** and **lax tissues**¹.

Cristalline Soft-AD™ Surface

Stablex™ Cohesive Gel

GCA® 360° barrier layer

Luna XT™ is designed to improve the natural appearance of the breast. Its Crystalline Soft-AD™ surface features have been associated with promoting tissue adhesion and decreasing rotation or displacement³.

Luna XT™ is equipped with a high performance shell to protect you against complications⁴.

In addition, this innovative breast implant includes a protective GCA® 360° barrier layer technology that greatly

contributes to achieve implant safety by minimising the risk of gel diffusion⁴.

Made with the Stablex™ Cohesive Gel, Luna XT™ maintains its dimensions and form regardless of day-to-day activities.

What's more, Luna XT™ are 100% filled⁴, which may reduce the potential for wrinkling³, and you can choose a wide range of projections, heights, and volumes that suit your body and needs².

GCA Comfort Plus™ Warranty

Our comprehensive lifetime warranty, offered against all our GCA® breast implants, features:

- Free of charge replacement of the implants in the event of rupture and capsular contracture (Grade III/IV on the Baker Scale)⁵.
- Free of charge replacement of implants in the event of a BIA-ALCL clinically diagnosed by surgeons or other medically qualified professionals and up to 3,000USD reimbursement of patient expenses for re-operation⁵.
